OSSIAM STOXX® EUROPE 600 EQUAL WEIGHT NR (UCITS ETF 1C (EUR) ISIN: LU0599613147) a sub-fund of OSSIAM LUX SICAV

Management Company: Ossiam, part of the Natixis group of companies

Objectives and Investment Policy

Investment objective:

The investment objective of the OSSIAM STOXX® EUROPE 600 EQUAL WEIGHT NR fund (the “Fund”) is to replicate, before the Fund’s fees and expenses, the performance of the STOXX® EUROPE 600 EQUAL WEIGHT Index Net Return EUR closing level.

The STOXX® EUROPE 600 EQUAL WEIGHT Index Net Return EUR (the “Index”, ISIN: CH0117519055) is a total return index (net dividends reinvested), calculated and published by STOXX (the “Index Provider”), expressed in EUR.

The STOXX® EUROPE 600 EQUAL WEIGHT Index is the equally-weighted version of the widely followed STOXX® EUROPE 600 Index (the “Base Index”) which tracks the performance of 600 leading companies in major industries of 18 European countries. The Index has the same constituents as the capitalization weighted STOXX® EUROPE 600 Index, but each company in the Index is allocated the same weight (0.1667% in normal circumstances), rebalanced quarterly. As such, sector exposures in the Index will differ from those of the Base Index.

For a detailed description of the Index, see section “Description of the Index” in the Fund Appendix of the Prospectus.

Investment policy:

In order to achieve its investment objective, the Fund will primarily use index swaps with the objective of gaining exposure to the Index through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance of which will be exchanged against the performance of the Index through a swap agreement with a swap counterparty. This method implies a counterparty risk as described in the below Risk and Reward Profile. The net asset value per share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swap will be a first class financial institution that specializes in this type of transaction.

The Fund may also enter into multiple swap agreements with multiple swap counterparties with the same characteristics as previously described.

Alternatively, the Fund may invest in all or part of the equity securities comprised in the Index.

The Fund may, with due regard to the best interest of its Shareholders, decide to switch partially or totally from one of the above described policies to the other (i.e. synthetic replication vs. physical replication).

In both replication strategies, the Fund shall be permanently invested for a minimum of 75% in equities or rights issued by companies having their registered office in the European Economic Area, excluding Liechtenstein.

In addition and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes and enter into securities lending and borrowing transactions as well as repurchase agreement transactions, as described under “Use of Derivatives, Special Investment and Hedging Techniques” in the Prospectus.

The Reference Currency of the Fund is the Euro.

The UCITS ETF 1C (EUR) shares are listed for trading on one or more stock exchanges and investors may buy or sell Shares through their usual broker on any trading day of the relevant stock exchange(s) which is also a Dealing Day in Luxembourg or, through a fund platform. Please contact your broker for additional information. The UCITS ETF 1C (EUR) Share Class is an accumulating Share Class therefore income derived from the Fund is reinvested. Please refer to the section entitled “Subscription, Transfer, Conversion and Redemption of shares” and the section entitled « Practical information » of the Fund appendix in the Prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

Risk and Reward Profile

The Fund is ranked 5 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to equity markets, the Fund may experience significant volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Fund. The lowest category does not mean “risk free”.

Special Risk Considerations

Index Risk:

The value of the Fund’s Shares is linked to the Index, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the underlying methodology of the Index will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.

Derivative and counterparty risk:

As a result of entering into swap(s) transaction(s), the Fund is subject to potential counterparty and issuer risk. In the event of insolvency or default of the counterparty or issuer, the Fund could suffer a loss.

The value of the swap(s) transaction(s) may vary according to several factors such as (but not limited to) the level of the Index, the level of interest rates and the liquidity of the equity market.

Please refer to the section entitled “General risk considerations” of the Prospectus for additional details on risks.
