OSSIAM MSCI CANADA NR (1C (EUR) ISIN:LU0876440735) a sub-fund of OSSIAM LUX SICAV

Management Company: Ossiam, part of the Natixis group of companies

Objectives and Investment Policy

Investment objective:

The investment objective of OSSIAM MSCI CANADA NR fund (the "Fund") is to replicate, before the Fund's fees and expenses, the performance of the MSCI CANADA Index Net CAD (the "Index") closing level. The Fund is passively-managed. The Index is expressed in Canadian dollar and calculated and published by MSCI (the "Index Provider").

The MSCI Canada Index is designed to measure the performance of the large and mid-cap segments of the Canada market. With 100 constituents, the index reflects the performance of approximately 85% of the free float-adjusted market capitalization in Canada.

For a detailed description of the Index, see section "Description of the Index" in the relevant Fund Appendix of the Prospectus.

Investment policy:

In order to achieve its investment objective, the Fund will primarily use index swaps with the objective of gaining exposure to the Index through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance of which will be exchanged against the performance of the Index through a swap agreement with a swap counterparty. This method implies a counterparty risk as described in the below Risk and Reward Profile. The portfolio of assets held by the Fund shall be permanently invested for a minimum of 60% in equities or rights issued by companies having their registered office in OECD countries

The net asset value per share of the Fund will therefore increase (or decrease) according to the evolution of the Index. Alternatively, the Fund may invest in all or part of the equity securities comprised in the Index.

The Fund may, with due regard to the best interest of its Shareholders, decide to switch partially or totally from one of the above described policies to the other (i.e. synthetic replication vs. physical replication).

In addition and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes and enter into securities lending and borrowing transactions as well as repurchase agreement transactions, as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus.

The Reference Currency of the Fund is the Canadian Dollar.

The 1C (EUR) shares may only be subscribed and redeemed by approved investors through their usual intermediary and authorized participants on any Dealing Day in Luxembourg. Please contact your intermediary for additional information. The 1C (EUR) Share Class is an accumulating Share Class, therefore income derived from the Fund is reinvested. Please refer to the section entitled "Subscription, Transfer, Conversion and Redemption of shares" and the section entitled "Practical information" of the Fund appendix in the Prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

Risk and Reward Profile

The Fund is ranked 6 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to equity markets, the Fund may experience significant volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Fund. The lowest category does not mean "risk free".

Special Risk Considerations

Index Risk:

The value of the Fund's Shares is linked to the Index, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the underlying methodology of the Index will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.

Derivative and counterparty risk:

As a result of entering into swap(s) transaction(s), the Fund is subject to potential counterparty and issuer risk. In the event of insolvency or default of the counterparty or issuer, the Fund could suffer a loss.

The value of the swap(s) transaction(s) may vary according to several factors such as (but not limited to) the level of the Index, the level of interest rates and the liquidity of the equity market.

Geographic Concentration:

Funds that concentrate investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the funds invest may be significantly affected by adverse political, economic or regulatory developments.

Please refer to the section entitled "General risk considerations" of the prospectus for additional details on risks.
