

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

OSSIAM MSCI JAPAN NR (Hedged Index 1C (EUR) ISIN: LU1655103726) a sub-fund of OSSIAM LUX SICAV

Management Company: Ossiam, part of the Natixis group of companies

Objectives and Investment Policy

Investment objective:

The investment objective of the OSSIAM MSCI JAPAN NR (the "Fund") is to reflect, before the Fund's fees and expenses, the performance of the MSCI JAPAN Index (Ticker: M7JP INDEX) (the "Index") calculated and published by MSCI (the "Index Provider"). The Index is a net total return index (net dividends reinvested) expressed in JPY. The Fund is passively-managed.

The Hedged Index 1C (EUR) share class will aim at replicating the performance of the MSCI Japan 100% Hedged to EUR Index (Ticker: MXJPHEUR INDEX) (the "Hedged Index"). The Hedged Index is a version of the Index denominated in EUR embedding a currency hedge. The Index and the Hedged Index are both calculated and published by Index Provider.

The MSCI Japan Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity performance of the large and mid cap segments of the Japan market.

The Hedged Index portfolio construction will follow the same methodology as the Index. In addition, in order to reflect the performance of the Index hedged in Euro, the Hedged Index will be calculated using one-month forward contracts to hedge currency exposure.

For a detailed description of the Index, see section "Description of the Index" in the relevant Fund Appendix of the Prospectus.

Investment policy:

In order to achieve its investment objective, the Fund will use combination of swaps with the objective of tracking the Index performance through synthetic replication. In that case, the Fund will invest in a portfolio of assets, the performance or the value of which will be exchanged against the performance or the value of the Index or a related index, or a portfolio of its constituents through a combination of swap agreements with a swap counterparty. This method implies a counterparty risk as described in the below Risk and Reward Profile. The net asset value per share of the Fund will therefore increase (or decrease) according to the evolution of the Index. The counterparty to the swaps will be a first class financial institution that specializes in this type of

transaction. The Fund may also enter into multiple combinations of swap agreements with multiple swap counterparties with the same characteristics as previously described.

The Fund may, with due regard to the best interest of its Shareholders, decide to switch partially or totally from synthetic replication (as described above) to physical replication.

In both replication strategies, the Fund shall be permanently invested for a minimum of 60% in equities or rights issued by companies having their registered office in OECD countries.

In order to track the Hedged Index performance and to reduce the impact of exchange rate fluctuations between the currency of the Index and the currency in which the Hedged Index is calculated, the Fund will in addition to the use of swaps, enter into currency forward contracts and/or directly invest in swaps that pay the value or performance of the Hedged Index or a related index.

In addition and on an ancillary basis, the Fund may use other derivatives for hedging and investment purposes and enter into securities lending and borrowing transactions as well as repurchase agreement transactions, as described under "Use of Derivatives, Special Investment and Hedging Techniques" in the Prospectus.

The Reference Currency of the Fund is the Japanese Yen.

The Hedged Index 1C (EUR) shares may only be subscribed and redeemed by investors through their usual intermediary and authorized participants on any Dealing Day in Luxembourg. Please contact your intermediary for additional information. The Hedged Index 1C (EUR) Share Class is an accumulating Share Class, therefore income derived from the Fund is reinvested. Please refer to the section entitled "Subscription, Transfer, Conversion and Redemption of shares" and the section entitled "Practical information" of the Fund appendix in the Prospectus for additional information.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

Risk and Reward Profile

The Fund is ranked 6 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to equity markets, the Fund may experience significant volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Fund. The lowest category does not mean "risk free".

Special Risk Considerations

Index Risk:

The value of the Fund's Shares is linked to the Index, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the underlying methodology of the Index will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.

Derivative and counterparty risk: As a result of entering into swap(s) transaction(s), the Fund is subject to potential counterparty and issuer risk. In the event of insolvency or default of the counterparty or issuer, the Fund could suffer a loss.

The value of the swap(s) transaction(s) may vary according to several factors such as (but not limited to) the level of the Index, the level of interest rates and the liquidity of the equity market.

Geographic concentration risk

Funds that concentrate investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the funds invest may be significantly affected by adverse political, economic or regulatory developments.

Please refer to the section entitled "General risk considerations" of the prospectus for additional details on risks.

Charges for this Fund

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Charges by Share Class - Share Class Hedged Index 1C (EUR)

One-Off charges taken before or after you invest

Entry Charge	Maximum Sales Charge 3.00% Maximum Replication Charge for Subscriptions 1.00%
Exit Charge*	Maximum Redemption Charge 3.00% Maximum Replication Charge for Redemptions 1.00%

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from the Fund over a year

Ongoing Charges: 0.50% p.a.

Charges taken from the Fund under certain specific conditions

Performance Fee: None

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser.

* An additional levy up to 2.00% may be applied to an investor engaging in excessive trading or market timing practices.

The ongoing charges figure is based on expenses for the year ending December 2019. This figure may vary from year to year. It excludes the portfolio transaction costs, except in the case of an entry/exit charge paid by the SICAV when buying or selling units in another collective investment undertaking.

For more information about charges, please refer to chapters “Charges and Expenses” and “Subscription, transfer, conversion and redemption of shares” of the Fund’s Prospectus, which is available at www.ossiam.com.
