OSSIAM US MINIMUM VARIANCE ESG NR UCITS ETF (the “Fund”) (1A (EUR) ISIN IE00BHNGHX58) a sub-fund of OSSIAM IRL ICAV (the “ICAV”)

Management Company: Ossiam, part of the Natixis group of companies

Objectives and Investment Policy

Investment objective:

The investment objective of OSSIAM US MINIMUM VARIANCE ESG NR UCITS ETF is to replicate, before the Fund’s fees and expenses, the performance of the US ESG Minimum Variance Index NR (the “Index”). The Fund is passively-managed.

The Index is a total return index (net dividends reinvested) expressed in USD, calculated and published by Solactive AG (the “Index Provider”).

The Index reflects the performance of a dynamic selection of stocks which satisfy ESG (Environment, Social and Governance) criteria among the most liquid stocks from the Solactive US Large Cap Index (the “Base Index”). The Base Index tracks the performance of about 500 leading large capitalization companies in major industries in the United States of America. Constituents of the Index will be selected on a monthly basis and weighted according to an optimization procedure. As such, sector and company exposures in the Index will differ from those of the Base Index.

For a detailed description of the Index, see section “Description of the Index” in the supplement of the Fund.

Investment policy:

In order to achieve its investment objective, the Fund will primarily invest, through physical replication, in all or part of the equity securities comprised in the Index and in substantially the same weights as in the Index.

The Fund shall be permanently invested for a minimum of 60% in equities or rights issued by companies having their registered office in OECD countries.

The Fund may not invest in financial derivative instruments.

The Reference Currency of the Fund is the US Dollar.

The 1A (EUR) shares are listed for trading on one or more stock exchanges and investors may buy or sell shares through their usual broker on any trading day of the relevant stock exchange(s) which is also a Dealing Day in Ireland or, through a fund platform. Please contact your broker for additional information.

The 1A (EUR) Share Class is an accumulating share class therefore income derived from the Fund is reinvested.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within less than 5 years.

Please refer to the supplement of the Fund (the “Supplement”) for additional details about the objective and investment policy.

Risk and Reward Profile

The Fund is ranked 5 on the synthetic risk and reward indicator scale, which is based on historical data. Due to its exposure to equity markets, the Fund may experience significant volatility, as expressed by its rank on the above scale. Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. There is no capital guarantee or protection on the value of the Fund. The lowest category does not mean “risk free”.

Geographic concentration risk: Funds that concentrate investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the funds invest may be significantly affected by adverse political, economic or regulatory developments.

Currency Risk at Share Class level: Share Classes which are denominated in currencies other than the Base Currency are unhedged. As such, the Net Asset Value per Share of such Share Classes will follow fluctuation in the exchange rate between the Share Class currency and the Base Currency, which can generate additional volatility at the Share Class level.

Please refer to the Supplement and to Ossiam IRL ICAV prospectus (the “Prospectus”) for additional details about the risks.

Special Risk Considerations

Index Risk: The value of the Sub-Fund’s Shares is linked to the Index, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the underlying methodology of the Index will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.

Market Risk: The value of the Fund’s Shares is linked to equities, the value of which may rise or fall. Hence, investors should note that the value of their investment could fall as well as rise and they should accept that there is no guarantee that the strategy of the Sub-Fund will indeed result in a return above any comparable investment strategy or that they will recover their initial investment.
