

Global Multi Asset Risk Control Index

Rebalancing Report - 01-Mar-2019

Stock Statistics

Global Multi Asset Risk Control Index has fixed rebalancing dates on the last index trading day of February, May, August and November, and optional rebalancings if the level of the VIX is higher or equal than 25% four days before the end-of-month of the remaining months. The new composition is implemented at the opening of the next index trading day after the rebalancing date. The weights are computed using closing prices four days prior to the rebalancing date. Both the Global Multi Asset Risk Control Index and the benchmark MultiAsset 60/40 are computed in EUR. The calculations in the document are performed by Ossiam using Bloomberg/Datastream source.

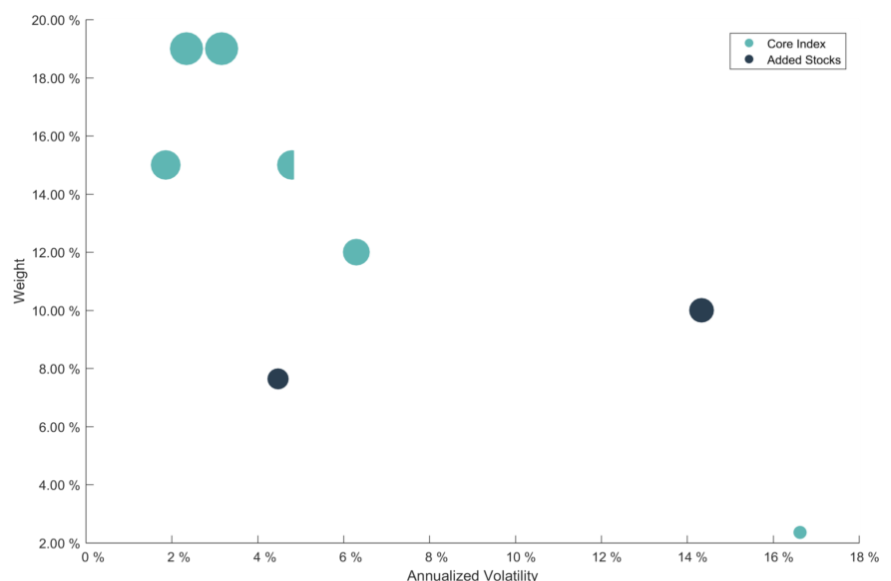

The number of constituents in the index is stable. The Turnover is **47.54%**, lower than its historical mean at **76.87%**. The weight of the index Core Portfolio increased from **78.97%** to **82.36%**.
